## “IDENTITY & ACCESS GOVERNANCE”

Ensure the success of your IAG project with AdronH !

If you face identity and/or access management issues, AdronH supports you from the beginning to the end of your project; from launch of call for tenders to the implementation of the solutions.

### Beyond project management...

Thanks to our expertise in managing complex and internationally recognized IAG projects, we guarantee you a high level of excellence, regardless of your IT environment or working methods.

A real bridge between IT and Business, able to interact at all levels of your organization, from technical teams to the executive committees, AdronH will support you in setting up your IAG solutions.

Working with all market products, we ensure the link with your suppliers. Our committed experts work with Agile or traditional methods.

### Our approach

Our approach is to support you from the start to the end of your projects: from drafting of calls for tenders, selection of the most suitable solutions, selection of integrators, to the follow-up of the implementation of the solutions. Our team will interface with IT, business, HR, and integrator teams to ensure the success of your projects.

Our consultants will follow your project management methods. AdronH recommends managing IAG projects with agility and allowing to demonstrate the benefits of each step and adjust to organizational or technical requirements or constraints that may occur during projects.

### Your Challenges

- Restructure or merge of entities requiring a review of existing processes and tools,
- Automate existing processes or compensate obsolete processes,
- Set up a CyberSecurity program to meet security requirements, with a deadline to respect,
- Lack of internal resources with skills in terms of IAG projects and / or lack of time,
- Better respond to audits, internal and / or external, and provide proof with deadlines to be respected .....

## “IDENTITY & ACCESS GOVERNANCE”

### High level of excellence

Our 4 eyes-4 ears scheme:

Our team is made up of a project manager and a mentor, to combine the operational experience of the project manager with the mentor's vision and experience. Thus, we offer you:

- High level of excellence,
- Better understanding of the context, your constraints and challenges,
- Continuity and resilience of the service.

Quantified monitoring of the project :

To maintain a high level of trust, AdronH uses an Identity Maturity Matrix (IMM), which allows you to better quantify the evolution and contributions of the project.

### Focus on our IAG expertise

- The success of an IAG project depends above all on the adherence of all the stakeholders in your organization. The detection and consideration of particularities of each segment is crucial for the success of the project: AdronH knows how to dialogue and to listen to different teams so that the project involves all the people impacted by the change.
- An IAG project is not just a technical project; it must bring value to the company within a controlled period and budget: AdronH helps you put in place a change management plan in order to facilitate the adoption of new processes and tools by the various impacted entities.
- An IAG project must be segmented into different deliverables in order to have agility in deployments and partial rollbacks. A gradual deployment minimizes the tunnel effects and justifies the ROI invested: AdronH has experience in complex projects within large national and international groups.

### Why ADRONH ?

- Recognised actor in managing complex IAG projects, AdronH provides you with a complete, strategic and pragmatic vision of your project
- Certified security experts and a synergy between teams to provide the best solutions adapted to the needs of each of our clients
- Our consultants are highly qualified and experienced on IAG projects, regardless of market solutions, and have experience within large groups, in various sectors such as industry, finance, and insurance
- We give each of our clients keys for autonomy in IT security via a change management plan, user awareness sessions and support.
