Information Security Manager

ADRONH
FUNDAMENTAL SECURITY

Join a young company active in **Luxembourg** and neighboring countries.
We help our customers put security at the heart of their digital transformation.
Although our field is profoundly digital, we put people at the heart of our business.

Your profile

Degree in **Computer Science, Information Security**, or equivalent.
Experience: **3-5 years** in information security or a similar role
Certifications preferred: **ISO27001, ISO 27005, CISM, CISSP**, or equivalent.
Ability to work in a multicultural environment and meet demanding deadlines.

Your skills:

- **Technical skills**
  - Proficiency in ISO 27001, ISO 27005, and regulatory frameworks such as NIS2 and DORA.
  - Expertise in risk analysis, penetration testing, and incident management.
  - Solid understanding of IT security tools (IAM, SIEM, GRC tools).
- **Management and Communication**
  - Strong project management skills and ability to coordinate cross-functional teams.
  - Ability to communicate cybersecurity challenges to non-technical teams.
  - Fluency in English and French (German and Luxembourgish are a plus).
- **Regulations and Compliance**
  - Proven experience in projects ensuring compliance with legal and regulatory frameworks in Europe.

Your responsibilities

Information Security Management

- Design, implement, and maintain an **Information Security Management System (ISMS)** in compliance with **ISO 27001** and **ISO 27005**.
- Ensure alignment of security practices with the requirements of the **NIS2 Directive** and **DORA Regulation**.
- Identify and assess risks related to formation systems and propose appropriate corrective measures.

Governance, Risk and Compliance (GRC)

- Develop and maintain an effective **Governance, Risk, and Compliance** framework.
- Create and update policies and procedures related to information security.
- Coordinate internal and external audits to ensure regulatory and contractual compliance.

Your responsibilities

Incident Management and Business Continuity

- Establish and oversee processes for managing **security incidents**.
- Develop and maintain **Business Continuity Plans (BCP)** and **Disaster Recovery Plans (DRP)** in line with identified risks.

Communication and Awareness

- Raise awareness among internal teams about cybersecurity challenges.
- Collaborate with internal and external stakeholders to ensure a coordinated security approach.

Security Project Management

- Oversee projects related to compliance with **NIS2, DORA**, and other regulatory requirements.
- Evaluate and integrate security tools to enhance the organization's overall security posture.
