Shared-CISO

ADRONH FUNDAMENTAL SECURITY

Join a young and dynamic company operating in Luxembourg and neighbouring countries. As a vCISO, you will support several SMEs and mid-sized companies in strengthening their cybersecurity posture. As a trusted advisor to business leaders, you will work on both strategic and operational cybersecurity topic

Your Responsibilities

You are able to identify risks, define realistic cybersecurity roadmaps, and actively contribute to their implementation alongside IT teams and technical partners.

- Conduct risk assessments and security audits.
- Define and lead cybersecurity improvement plans.
- Advise business leaders on cybersecurity-related decisions.
- Participate in security investigations and incident management.
- Review and challenge IT architectures, configurations and service providers.
- Support the implementation of security best practices (Microsoft 365, MFA, Backup, EDR, Vulnerability Management).
- Deliver security awareness sessions and executive reporting..

Your profile

At least 3 years of experience in cybersecurity, ideally in a consulting, security architecture or governance role.

Skills and competencies:

- Good knowledge of information security frameworks, standards, principles and controls (NIS2, ISO 27001, DORA, NIST, CSSF etc.).
- Expertise in Microsoft 365, Entra ID, Defender and Azure environments.
- Ability to explain complex topics in a clear and accessible way.
- Autonomous, pragmatic and customer-oriented mindset.
- Motivation to support multiple clients with diverse challenges

Nice to have:

- Experience working with SMEs.
- Curiosity, passion and a good sense of humour.

+

A people-focused company committed to social responsibility.
A culture built on trust, autonomy and mutual respect.
Room to support and develop your own social impact initiatives.
Competitive compensation aligned with your experience, skills and interests
